

## Organic yarn from Sweden

The Herrvik Farm is located in central Sweden, in a lush, green landscape, bordering a lake so pure that we use it for drinking!

Kerstin and Johan Morner  
Herrvik Farm, 15594 Nykvarn, Sweden

Our sheep production is small-scale and is mainly based on Swedish breeds that yield soft and beautiful wool.

The natural colors range from white to black, and from light tan to dark brown.

Different natural wool colors are combined in our artistic yarn. This yarn produces beautiful effects in into ponchos, plaids, etc

We use vegetable dyeing to produce harmonious colors.

Our woolen yarn is also twisted together with flax yarn. The result is a strong yarn with a special luster.

Our whole production is certified organic.

You are welcome to contact us if you are looking for soft and beautiful yarns that cannot be found anywhere else!
